

Council Meeting Synopsis September 20th, 2022

Minutes from the regular meeting of council held August 16th are available under the Governance tab at www.villageofsedley.com

September 13th, Mayor Currie and CAO Gillies met with representatives from CanPacific Potash to hear an update on the Sedley test plant. Currently, the project is in “care & maintenance” mode after completing the surface test facility.

The plant will test a new technology/methodology for extraction which uses less water, less natural gas and leaves no trailing pile and a higher product concentration.

Next stage of the project is to drill the underground test caverns. Plant is forecast to return to operations early next year. The test plant will run 6 months to 1 year. Depending on the results a commercial plant could take up to 5 years to build.

Shaun Folden from Harvard Western Insurance attended the meeting to review our insurance policy. This is done on an annual basis just prior to the policy expiration to ensure our municipal properties and equipment are adequately insured in the event of a loss.

A Remote Working Policy was reviewed and adopted as amended. A copy can be viewed on the Minutes tab at www.villageofsedley.com.

We are currently seeking a Request for Quote from various HVAC companies to perform spring and fall maintenance on our heating and ventilations systems.

2023 library hours will remain the same as 2022 hours. Each year, Southeast Regional Library asks council to review the current service levels and allows the opportunity to make any changes.

The next meeting of council will be October 19th at 7:00 PM at the Village Office.

Committee Updates
